Sustainable Rally Charter 2024

Sustainable Rally Charter

The Rally community has come together to design and agree the following charter and commitments to acknowledge its role in creating a more sustainable future. By adopting this charter, we are agreeing to action on demonstrating more sustainable behaviours in order to sustain our sport.

As a discipline that uses the natural environment to create its events, the Rally community view themselves as being stewards of the environment. Working together with Motorsport UK, our venues and our spectators, to reduce our greenhouse gas emissions, protect biodiversity and work with local communities to run our events, that ensures that they can go on for years to come.

We will

- Guarantee that sustainability is a key consideration when planning any event activity and actively discussed throughout.
- Ensure that all venues should be left in the way in which they were found. We take into account any ecologically sensitive areas, artefacts of heritage or cultural significance and will work within any local conditions and carry out environmental or biodiversity impact assessments if required to protect local flora and fauna while holding our events.
- Engage with Motorsport UK resources and tools to encourage more sustainable events, this includes committing to receive Motorsport UK's sustainability accreditation by the end of 2024.
- As part of the accreditation clubs will support competitors, volunteers and spectators who want to make sustainable decisions by adopting sustainable policies via an environmental impact assessment that covers impact areas such as
 - Energy
 - Waste
 - Event materials such as single-use plastic and printed documentation
 - Catering
 - Noise
- Use Motorsport UK's Carbon Calculator for at least one event in 2024 (or first event thereafter) to measure the footprint of an event and have plans in place to reduce it.
- Ensure that all event infrastructure produced are reusable/recyclable
- Work with venues and third-party suppliers who have sustainable event policies and practices in place
- Communicate the clubs sustainability commitment and aims to club members, fans and event stakeholders in a transparent, authentic and easily understood way and to advocate for more sustainable events
- Be considerate of the local community you are operating in and consider opportunities to engage with local people throughout the event
- Ensure the health and well-being of all staff and visitors and promote good values and behaviours through Race with Respect
- Continually review all key elements of event planning to ensure we are operating in the most sustainable way
